

Four Card Poker

How to play

You receive five cards to make your best four-card poker hand. The Dealer receives six cards to make his four-card poker hand. See table layout for ranking of hands.

Play vs. Dealer

Bet on the required **Ante** spot to play against the Dealer's hand. Best four-card hand wins.

The player wins ties.

If you bet on the **Ante** wager and want to stay in the game after viewing your cards, a wager must be made on the **Play** spot. The **Play** wager has to be at least equal to the **Ante** but may be **up to three times** the **Ante**. It's your four-card poker hand against the Dealer's four-card poker hand – best hand wins!

The **Ante** and **Play** bets **pay** even money.

Automatic Bonuses

The top three hands in the game – four of a kind, straight flush and three of a kind – receive an automatic bonus payout on Ante bet – see table for odds.

Play Aces Up

Bet on the **Aces Up** spot and win when you're dealt a pair of Aces or better. The **Aces Up** bonus is always paid – even if the Dealer has a better four-card hand.

Aces Up wagers and **Automatic Bonuses** are paid even if the Dealer has a better four-card hand.
